

# COVID-19 Cumulative Hospitalizations

May 08, 2020

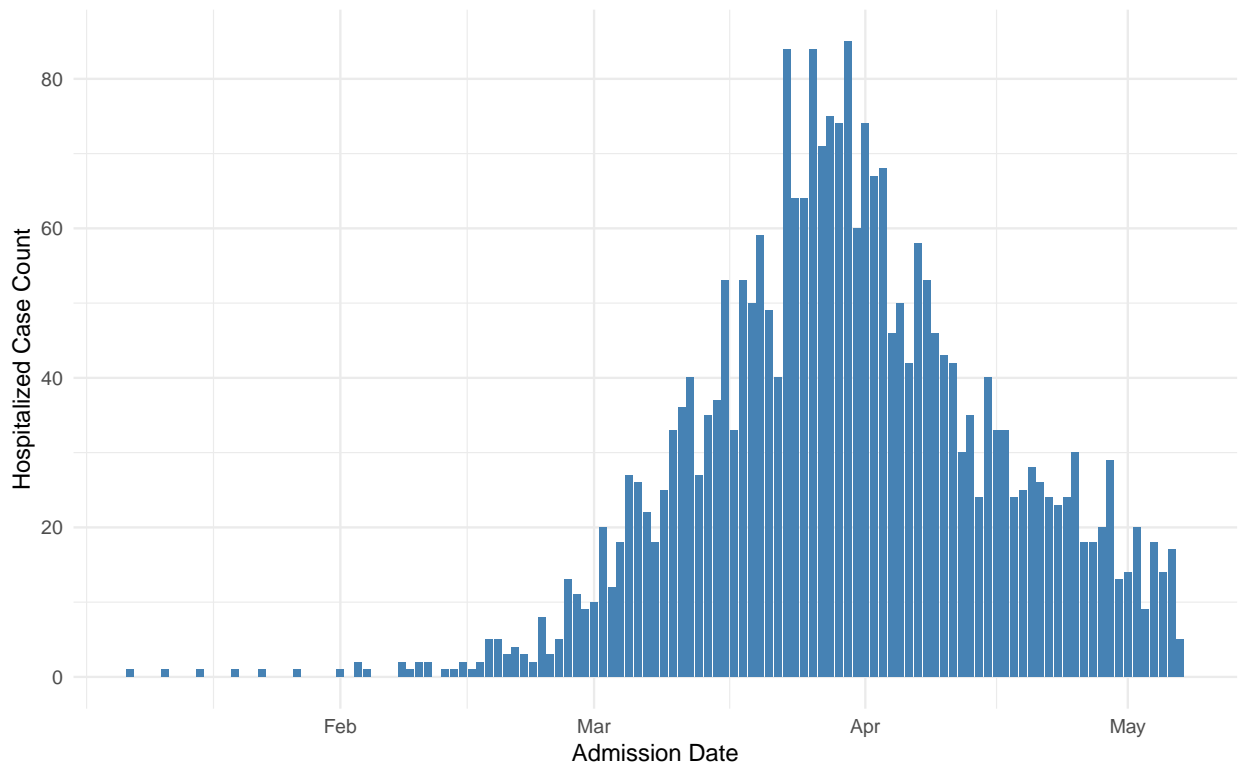

The following report contains data on hospitalizations identified among lab-confirmed cases of COVID-19 among Washington residents reported through 11:59pm on 2020-05-07.

*Note: To date, 100% of acute care hospitals have reported retrospective hospitalizations that occurred since January. Hospitalizations are being identified prospectively at 100% of acute care hospitals.*

**Table 1. COVID-19 Cases Hospitalized**

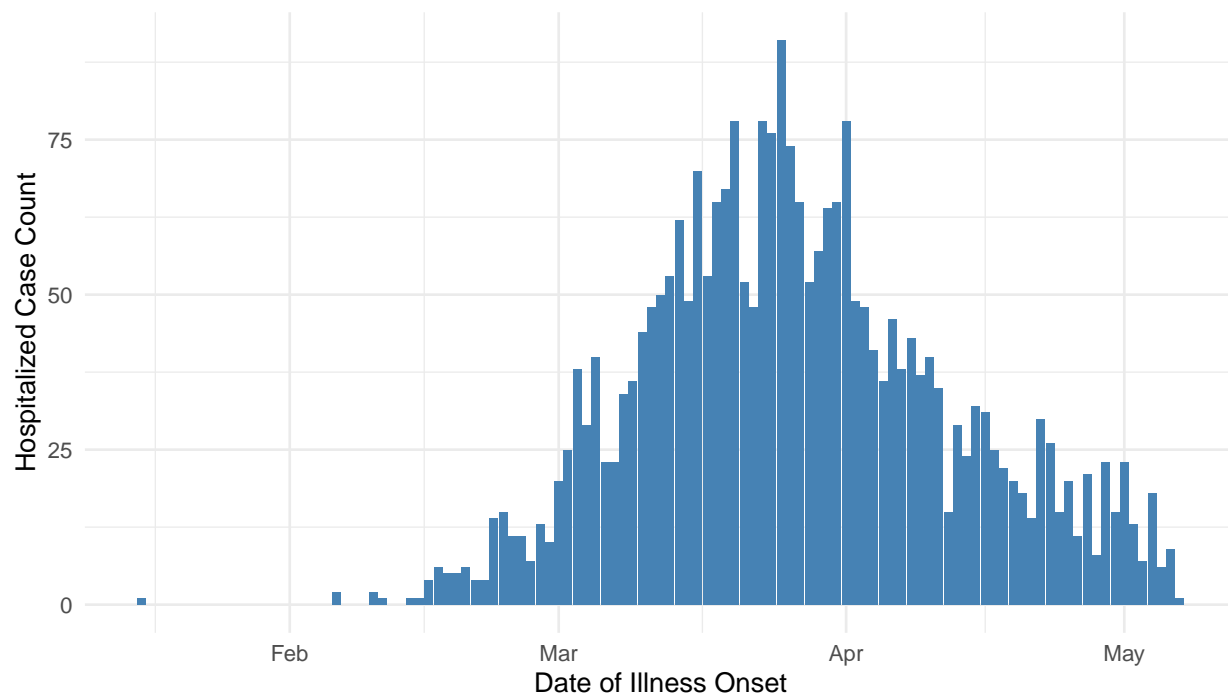

Hospitalized	Count	Percent of Cases
No	9599	77.9%
Yes	2719	22.1%
Unknown	4070	24.8%

**Figure 1. Epidemiological Curve of Hospitalized COVID-19 Cases by Date of First Admission\***

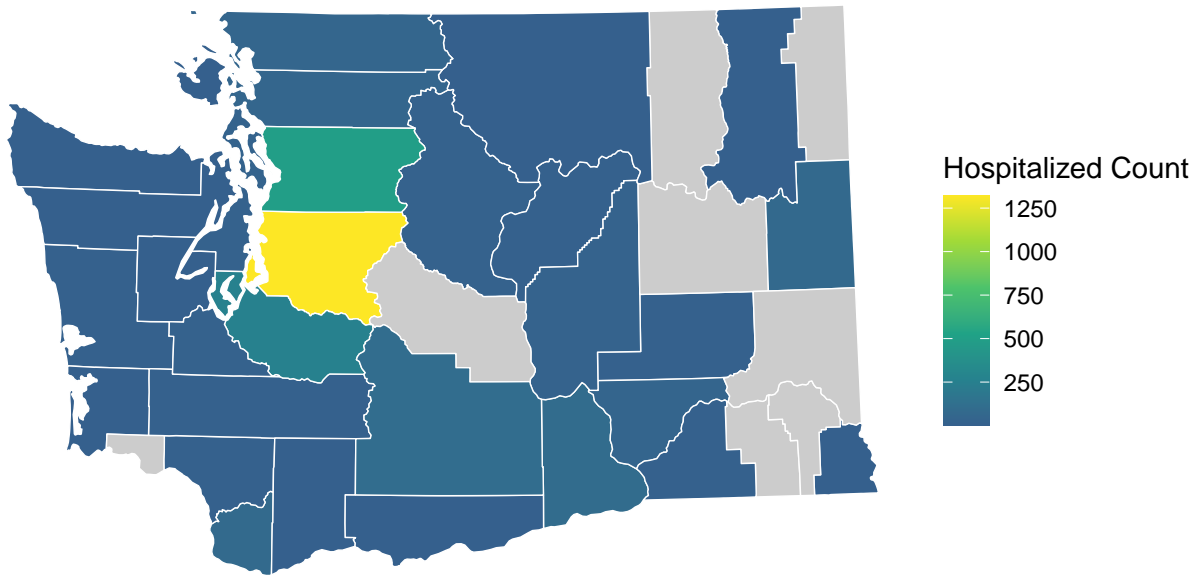

\* 57 records indicate the case was hospitalized but admission date is missing. These events are excluded from the chart.

**Figure 2. Epidemiological Curve of Hospitalized COVID-19 Cases by Illness Onset**

**Figure 3. Hospitalizations by County of Residence**

\*Counties that are greyed out have had 0 COVID-19 hospitalizations identified to date.

Figure 4. Hospitalizations by Age

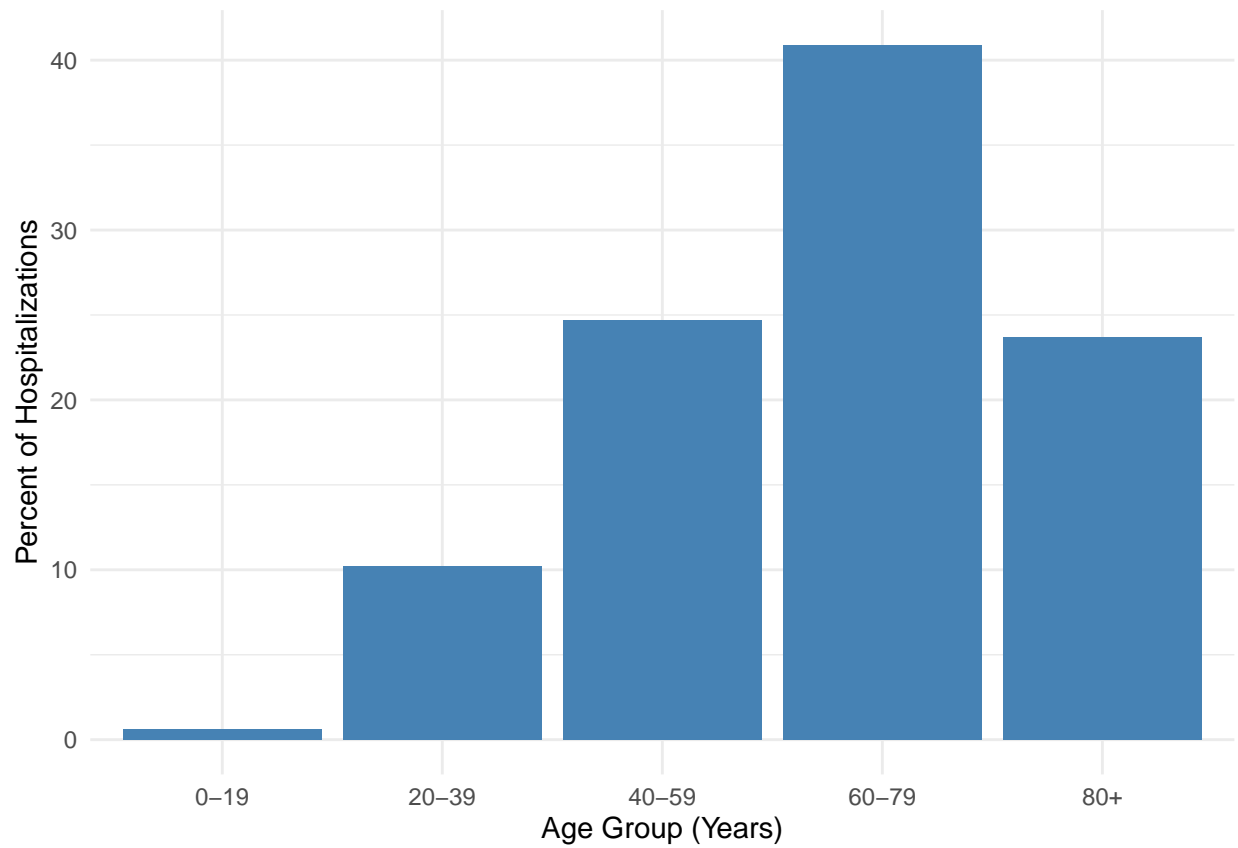

Table 2. Hospitalizations by Age

Age Group (years)	Percent of Hospitalizations
0-19	0.6%
20-39	10.2%
40-59	24.7%
60-79	40.9%
80+	23.7%
Unknown	0.0%

Figure 5. Hospitalizations by Sex

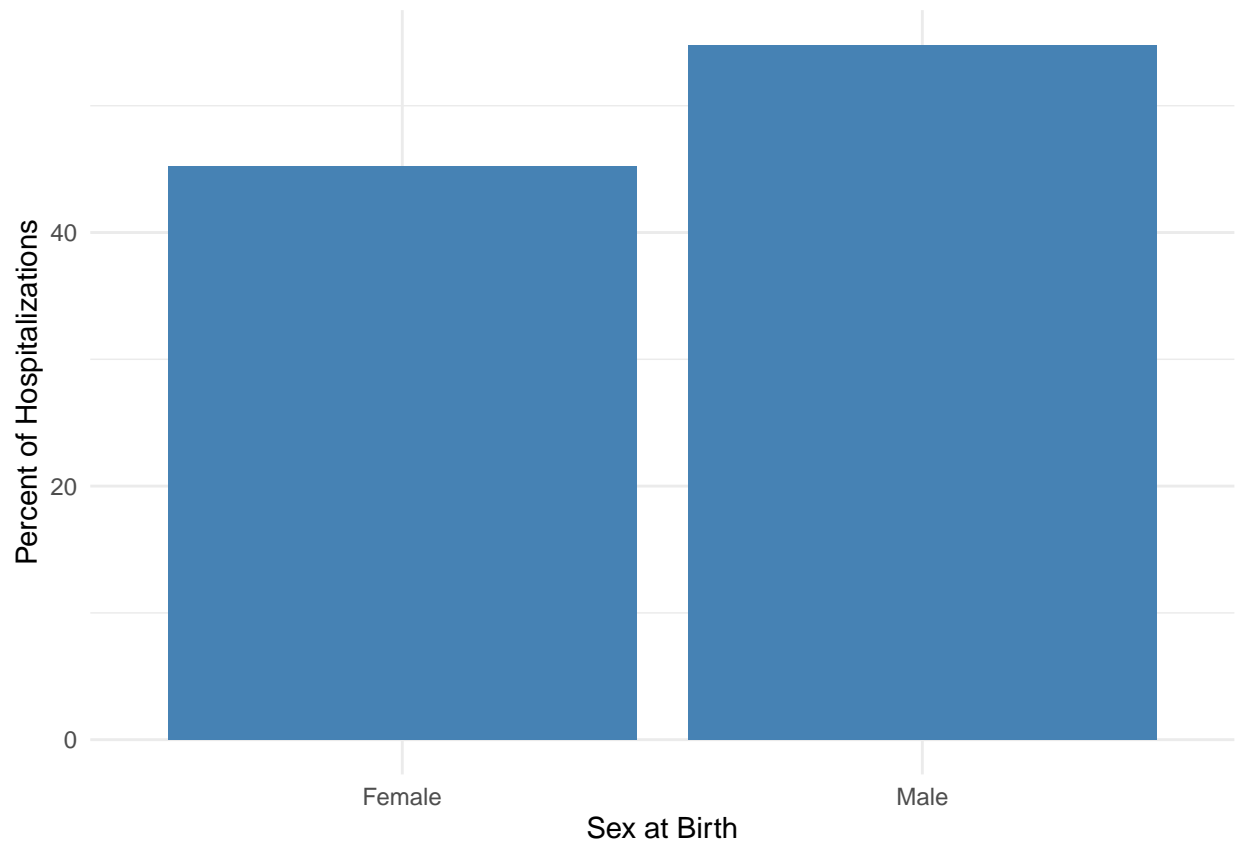

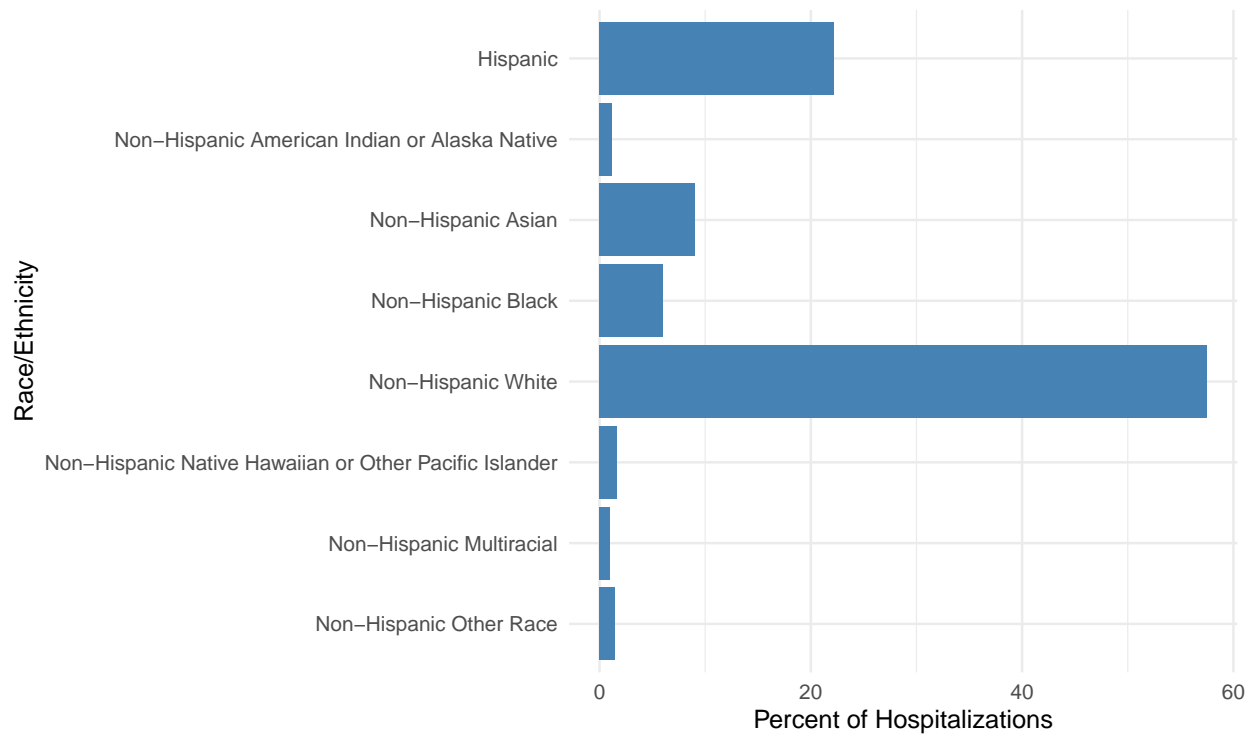

Table 3. Hospitalizations by Sex

Sex at Birth	Percent of Hospitalizations
Female	45.2%
Male	54.8%
Unknown	1.1%

**Figure 6. Hospitalizations by Race/Ethnicity**

**Table 4. Hospitalizations by Race/Ethnicity**

Race/Ethnicity	Percent of Hospitalizations
Hispanic	22.2%
Non-Hispanic American Indian or Alaska Native	1.2%
Non-Hispanic Asian	9.0%
Non-Hispanic Black	6.0%
Non-Hispanic White	57.5%
Non-Hispanic Native Hawaiian or Other Pacific Islander	1.7%
Non-Hispanic Multiracial	1.0%
Non-Hispanic Other Race	1.5%
Unknown	29.6%
